

2nd Nine Weeks At Home Project
Cells
Assigned November 12, 2010
Due – December 14, 2010

Choose one of the following activities to complete. Bring your completed project in to class on December 14, 2010. All projects must include organelles and their function.

1. **Draw** and **label** your cell, and label the **function** of each organelle.
2. Make a "cell city". Assign a building name for each organelle and **label** what it does. (for example: nucleus – mayor's office) **Write a paragraph explaining** why you chose to represent each organelle with the building you used.
3. Use a beach ball. **Draw** and cut out the organelles and glue them to the cell. **Label** them and their **functions**.
4. Use the play dough and make a cell model. **Label** the parts and their **functions**.
5. Record yourself describing the **organelles** and their **functions**. You can even make up a song.
